

UFO between Las Vegas and Newark

On September 13, 2016, I was on an airplane between Las Vegas (McCarran International Airport) and Newark (New Jersey). By watching accross the window, I noticed a mysterious bright object. It was white and moved in a constant speed. Its path was a right line. I didn't see wing or light on this object. I think that it flew at low altitude. I didn't take photo or video of this anomaly.
